
This page started
as a **courtside
spreadsheet.**

So we rebuilt it, line by line.

ATTENDANCE

Three colors.

Green: present. Yellow: unavailable. Red: absent. Yellow and red take a note with the reason.

AVAILABLE PLAYERS

Counted, not typed.

It's the number of green lights. Guests included.

TWO TIMERS

Activity and pauses, separately.

Net time = activity – pauses.

EFFECTIVE TIME

**Net × players used ÷
players available.**

Ten players in a drill with twelve available isn't the same drill for everyone.

INTENSITY

Effective time ×
courts in use.

Warm-up is one checkbox, and it stays out of the total. Breaks between drills don't count either.

COMPLETE SESSION

Every present player
gets their session.

With their effective duration already
calculated.

LAB21

Built for basketball,
not adapted to it.
