
Getting athletes to fill in wellness. Every day.

Three things. None of them is technical.

The problem **isn't** **the app.**

It's whether the athlete knows what it's for.

1 • EXPLAIN IT

Say what it's for.

An athlete who sees wellness as control won't fill it in. One who sees it shaping his week will.

2 • FIX THE MOMENT

Same time, every day.

Before breakfast, or when arriving at the gym. A fixed moment beats any reminder.

3 • SHOW IT

Close the loop.

When an athlete sees his numbers changed Thursday's session, filling it in stops being a chore.

And make the scale impossible to misread.

In TrainMind, 5 is always the best condition. On every item.

Five items. One minute.

Sleep · fatigue · pain · stress · mood.
Plus hours of sleep.
