
The end-of-day sheet.

What the daily report holds, and why.

TODAY

What was done.

Activities of the day, in one place.

AVAILABILITY

Every player, 0 to 5.

Out · rehab · no contact · reduced load ·
with substitutions · full training.

NOTES

One line **per player.**

The detail the numbers don't carry.

TOMORROW

The plan for the next day.

So the morning starts from a decision,
not a search.

CHECK FIRST

Suggested statuses on top.

If an injury or a return-to-play protocol suggests a status, it shows up first — to review before saving.

OUT

PDF, Word, or on its own.

Schedule it, and it goes out by email with the cadence you choose.
